The Journal and the Ostend Conference. The attack of the Journal, of Wednesday, upon Mr. Buchanan, for the sentiments expressed in what is known as the "Ostend Manifesto," exhibits a lameness and impotency which the editor of that paper would have done well to have kept out of the "arena" of public exhibition. We venture to say that, under ordinary circumstances, carefully weighing the arguments contained in the extract which the Journal publishes, against those which the editor puts forth in condemnation of them, would declare in fa-

Something that Interests every Man West's Patent Galvanic Cement FOR ROOFING!

L buildings with a new and better article than ever before known.

The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders for years, to discover an article for roofing purposes that would stand the adden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been obtained without costing more than the people wish. The contraction, expansion and rosting of metal roofs, are so great in this changeable climate, that they become useless, unless being repaired at a great expense yearly. Shingles are not lire-proof, and cannot be used on flat roofs,—and the various compositions and coments that have been brought into use positions and coments that have been brought into use for roofing, do not stand the action of the weather, but ran when it is warm, and crack when it is frosty; and after one or two years become crumbly and worthless. Whereas, the inventor of the Galvanic Cement has labored 20 years to combine article to obviate those difficulties, and can testify from his long experience and bored 20 years to combine article to obviate those dimensions of the Interior has directed the discontinuance of said district, and that the unsold lard as therein be made subject to said as therein be made subject to said and unappropriated by law, and it is combination spelled to their buildings, that his combination of this Coment is such, as large properties and best articles ever before known, and it also admirably adapted to Cars, Steambouts, &c. The combination of this Coment is such, that is calculated for entire new roots, flat or steep, covering over old shingles without removing them, liming ever troughs, seeming around battlements, chimners and say-lights. The inventor has traveled over many parts of the globe, visiting the principle hospitals, dispensing this Ointment, giving advice as to its application, and has thus been the means of restoring countless numbers Sore Legs, Sore Breasts, Wounds and

Some of the most scientific surgeons now rely solely on the use of this wonderful Ointment, when having to cope with the worst cases of sores, wounds, ulcers, glandular swellings, and tumors. Professor Holloway has, by command of the Allied Governments, dispatched to the hospitals of the East large shipments of this Ointment, to be used under the direction of the Medical Staff, in the cases of wounds. It will cure any ulcer, glandular swelling, stiffness or contraction of the joints, even of 20 years standing. Piles and Fistulas.

These and other similar distressing complaints can be effectually cured if the Ointment be well rubbed in over the parts affected, and by otherwise following the printed directions around each pot. Both the Ointment and Pills should be used in the following cases:
